THE EFFECTS OF MOBILE ON THE ENTERPRISE

55% of executives expect to support more devices in the next 12 months [3]

More devices means increased security risks for businesses via lost phones and tablets, user-error and software vulnerabilities [11]

A study found that when doctors' use of smartphones rose 9%, data breaches rose to **32%**

Violation of HIPAA regulations can lead to hundreds of thousands in fines to healthcare organizations [7]

52% of companies are focused on supporting mobile workers better [3]

In the U.S. **3 out of 5** workers say they no longer need to be in an office to be productive [1]

In 2013 more than **75%** of the workforce will be mobile

The average mobile worker will carry **3.5** devices [2]

84% of information security professionals rate lost devices as their number one concern [11]

In 2013 **3** million more households will become remote workplaces for employees

84% will use the same devices for both personal and work activities [9]

2012 saw a **58%** increase in mobile malware families, year-over-year [6]

32% of all mobile malware steals information from the compromised device

Mobile devices are enticing to malware developers because of the business-information employees store on them

On average a cell phone is lost in the U.S. every **3.5** seconds [5]

Mobile security vulnerabilities are rising **15%** year-over-year [4]

Majority of enterprises have reported at least one mobile security incident within the past 12 months [12]

Enterprises Need to Ensure Mobile Security

Enterprises need to consider:

- Mobile Device Management
- Mobile App Management
- Mobile Content Management

Accellion

Take your office to-go... with a shot of security.

Accellion®
